SECTION I.

INTRODUCTION.

The purpose of this Technical Report is to review the Draft Software Design Document for the PC UNIX (Air Force Configuration), Increment III, CDRL C006-01, which was produced for the Government by Evaluation Research Corporation. The results are provided in the form of Data Item Discrepancy worksheets as requested by the CMOS Program Office.

COMMENT OR RECOMMENDED CHANGE:

Delete references to development CSUs from this document. This comment also applies to paragraph 6.1.6, and any others that reference CSUs which are for development use only.

RATIONALE:

The SDD is intended to document the detailed design of CMOS. Software used to develop the system should be included in the Data Accession List, not in this document.

COMMENT OR RECOMMENDED CHANGE:

Reconcile that CU1A0065 is listed on this page as "no change", but is described as CUBA0065 in Attachment 1.

RATIONALE:

It appears that CU1A0065 and CU1C0065 were transposed in this table. CU1A0065 should perhaps reflect a "Major Mod" designation and CU1C0065 should reflect "no change".

COMMENT OR RECOMMENDED CHANGE:

Reconcile the "no change" comment in line four on this page in the Air Force Configuration Columns.

RATIONALE:

This is a new Navy Configuration CSU. A "no change" in the Air Force column is misleading and perhaps should read "not applicable". This same condition exists throughout referenced table.

COMMENT OR RECOMMENDED CHANGE:

Change "Packing and Crating" to "Planning and Packaging".

RATIONALE:

This would bring CSU in line with the recent name change.
